

ABSTRACT

CENSUS WORK AT MATLAB IN 1974

K.M.A. Aziz

In all the villages of Matlab Vaccine Trial Area a census was done in April - May, 1974. This report will give a description of the census work including the types of information obtained, the forms utilized, and instructions followed. In addition to the recording of name, age, and sex some socio-economic variables were included in the list of inquiries. In formulating questions attention was given not to include inquiries to which the informant might not respond spontaneously. In estimating socio-economic status of each family relevant objective types of information were recorded through observation and measurement. Problems faced during the execution of the census work will be narrated.
